### **DETAILED ACTION**

## Response to Arguments

1. Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

### **Drawings**

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "switch having at least two throw" in claims 1 and 6; the "radio telephone" in claim 12 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Application/Control Number: 10/535,737 Page 3

Art Unit: 2821

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1, 3-4, 6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Jackson et al (USP. 6,061,025).

Regarding claim 1, Jackson disclose an antenna arrangement in Fig. 5 and 14, comprising: an antenna element (152) (Fig. 14); a frequency adjusting arrangement for tuning said antenna element (Abstract) and (Col. 21, Line 40), wherein said frequency adjusting arrangement comprises: a load element (124) capacitively coupled to the said antenna element (152) (Fig. 14); and at least two lines, each of said at least two lines comprising one of a strip line and a microstrip line (Fig. 14); and a switch (155) (Fig. 14), the switch having at least two throws, each throw of said switch being connected to a different one of said at least two lines (Fig. 5) (Fig. 14), the switch being arranged to connect one of said at least two lines to the said load element (Col. 8, Line 37) (Fig. 14).

Regarding claim 3, Jackson disclose that the said load element is a patch (Col. 8, Line 25).

Regarding claim 4, Jackson disclose that the said antenna element is a patch (Abstract).

Regarding claim 6, Jackson disclose that one of said at least two throws of the said switch is connected to the strip or microstrip line of substantially zero length (Fig. 23).

Application/Control Number: 10/535,737

Art Unit: 2821

Regarding claim 7, Jackson disclose that one of the said lines, when coupled to theantenna said load element via the switch, provides a substantially open circuit at an operating frequency of the said antenna arrangement (Col. 9, Line 57).

Regarding claim 8, Jackson disclose that one of said strip lines, when coupled to the antenna element via the switch, provides a substantially short-circuit at an operating frequency of the antenna arrangement (Col. 9, Line 57).

Regarding claim 9, Jackson disclose that one of the said lines, when coupled to said antenna element via said switch (Fig. 16), provides an impedance (170) between a short and an open circuit at an operating frequency of the said antenna arrangement (Col. 9, Line 48) (Fig. 16 and 17).

Regarding claim 10, Jackson disclose that at least one of the said lines is connected to ground at its end opposite to the said switch (Fig. 24).

Regarding claim 11, Jackson disclose that at least one of the said stripe lines is insulated from ground at its end opposite to the said switch (Fig. 15).

Regarding claim 12, Jackson disclose that a radio telephone (Col. 13, Line 33).

### Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2821

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing

Page 5

date of this final action.

Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuc D. Tran whose telephone number is (571) 272-1829. The examiner can normally be reached on M-F Flex hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan can be reached on (571) 272-1740. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
